TEST # 5

DUVAN HENAO

P1. Find the formula of a cosine function with amplitude 3 and period π . Sketch the plot of that function.

P2. Which of the following functions

a) $f(t) = \sin\left(\frac{\pi t}{3} - 1\right)$

b) $f(t) = \sin\left(\frac{(t-1)\cdot\pi}{3}\right)$

c) $f(t) = \cos\left(\frac{(t-1)\cdot\pi}{3}\right)$

d) $f(t) = \sin\left(\frac{(t+1)\cdot\pi}{3}\right)$

corresponds to the plot in the figure?
